

Mega Foam

Car Shampoo Concentrate

- pH Neutral Formula
- Safe for Ceramic and Wax Coatings
- Rinses Clean without Streaks

SUPER THICK FOAM

Interchem's MEGA FOAM Car Shampoo is our most concentrated pH neutral soap and is designed for use in a foam cannon, or foaming accessory to provide thick pillows of foaming lubrication to your wash surface. Our formula prevents spotting even when washing in the direct sun. Use with Interchem's Foam Cannon Pro for best results. Can also be used in your wash bucket.

- Safely removes dirt, pollen, soot and other contaminants
- Does not remove wax or sealants, or dry out plastic and rubber
- Creates a huge amount of thick, clinging foam with a foam cannon setup.
- Only requires 2-3 ozs. per 32 oz. foam cannon to generate thick foam.

Directions:

Mix concentrate 2-4 ozs. for 32 oz. foam cannon. Shake well. Rinse the vehicle with a pressure washer to remove heavy dirt, mud etc. Spray foam onto vehicle, using as a pre-soak to help lift any remaining dirt. Use detailing brushes to agitate crevices/emblems/rims etc. while vehicle is covered in foam. Either rinse off, or begin two bucket hand wash process. Use with a foam cannon for maximum efficiency.
